ABOUT THE TRANSPORTATION INVESTMENT ADVOCACY CENTER (TIAC)

The Transportation Investment Advocacy Center™ (TIAC) is a first-of-its kind, dynamic education program and Internet-based information resource designed to help private citizens, legislators, organizations and businesses successfully grow transportation investment at the state and local levels through the legislative and ballot initiative processes.

The TIAC website, www.transportationinvestment.org, helps transportation investment advocates to mount successful campaigns. It exists to put in one place—and promote the sharing of—strategies… sample political and communications tools… legislative and ballot initiative language… and information on where to obtain professional campaign advice, research and help. To receive free, regular email updates from the TIAC, subscribe to the TranspoAdvocates Blog (www.transportationinvestment.org/blog).

TIAC staff produces regular research reports and analyses, hosts an annual workshop in Washington, D.C., and holds ongoing webinars for transportation investment advocates featuring case studies, best practices, and the latest in political and media strategies. State and local chamber of commerce executives, state legislators, state and local transportation officials, “Better Roads & Transportation” group members, industry and labor executives, and leaders of state and local chapters of national organizations who have an interest in transportation development programs are welcomed to participate.

The Center’s program of work is also guided by a Transportation Investment Advocates Council, a national network of business professionals and public officials who share a common interest in building support for transportation infrastructure investments in their state or local community—roads, bridges, public transit, pedestrian walkways and cycling paths, airports, waterways, ports and rail facilities.

TIAC is a project of the American Road and Transportation Builders Association’s “Transportation Makes America Work!”™ (TMAW) and supported through voluntary contributions and sponsorships.

To become a sponsor or to make a contribution, contact TIAC Director Carolyn Kramer (ckramer@artba.org, or at 202-289-4434). Also contact Ms. Kramer if you have questions or comments about any reports or case studies published through the TIAC, or would like more information on the program and the Council.
February 2019 State Transportation Funding Overview

Thirty-seven states introduced 185 bills related to increasing transportation investment in the first two months of 2019.

Motor fuel taxes continue to be a popular method to raise new revenue. Twenty-one states have proposed increasing one or more types of motor fuel tax to generate funding for transportation construction. Of those states, ten included altering or creating a variable-rate tax that fluctuates based on external factors such as the Consumer Price Index, average wholesale price of motor fuel, or other formulas.

Continuing a trend from previous years, several states introduced electric vehicle fees as a way to ensure all vehicles that create wear and tear on roads pay for their share of maintenance. Sixteen states filed legislation to implement an electric vehicle registration fee. Ten of those states also included an additional registration fee for hybrid vehicles.

Several states are also considering innovate funding solutions during the 2019 legislative session. Mileage based user fee studies or pilot programs are being considered in eight states. Additionally, four states have introduced legislation to utilize tolling for new revenue.

Of the legislation introduced in the first two months of 2019, only nineteen measures have advanced beyond their first chamber, with one bill— an electric vehicle registration fee increase in Wyoming— signed into law. One hundred sixty-six bills have been introduced and are awaiting further action. Several states have not yet convened for the 2019 legislative sessions, and at least one state— Alabama— is expected to file a significant transportation investment bill.

Estimated Funding Approved in 2019 Legislative Session: $128,000

Bill Number: SD 870
Notes: An Act to explore alternative funding sources to ensure safe and reliable transportation.

This bill is intended to help address the need for the commonwealth to identify short- and long-term alternatives or supplements to the motor vehicle fuel tax, which is particularly important given the diminishing value of the motor vehicle fuel tax, declining supplies of conventional petroleum-based fuels, and increasing fuel-efficient vehicles. The commonwealth is uniquely positioned to become a leader in the advancement of technology and methods needed to develop and implement alternative ways to raise transportation revenue. There shall be a vehicle mileage user fee task force to guide the development and evaluation of a pilot program to assess the potential for mileage-based revenue collection for Massachusetts' roads and highways as an alternative to the current system of taxing highway use through motor vehicle fuel taxes.

</table>
State gas tax increased 5.9 cents-per-gallon. The hike includes a new 2 percent assessment on the price of gasoline while slightly decreasing the per-gallon tax by 0.8 cents. It is estimated that by FY 2016 the tax could amount to a net hike of 6.5 cents. Diesel tax was also increased by 3 cents-per-gallon over two years. In addition to the approved $11 million bonds, it is anticipated that $32 million will be generated in FY 2016 for transportation infrastructure funding.

Gov. Maggie Hassan signed legislation to raise the New Hampshire gasoline and diesel fuel taxes by 4 cents-per-gallon. The tax will go into effect July 1 and had bipartisan political and business community support. The new gas tax will be 22 cents-per-gallon and the new diesel tax will be 23.6 cents-per-gallon. The tax will fund highway improvements for the next two years, and then half the tax will be earmarked to pay off $200 million in debt for Interstate 93 expansions. The tax will expire in 20 years after the debt is paid off.

Starting July 2015, the state gas tax will increase by 1-cent, a move that House Finance Committee Chairman Raymond Gallison says will produce an estimated $4.8 million a year. Subsequently the gas tax will be revisited every two years to reflect increases based on the rate of inflation.

In 2013, the Texas legislature approved a measure to redirect half of the revenue generated from oil and gas taxes away from the state’s general Rainy Day Fund, to be deposited into the State Highway Fund. Once in the Fund, the approximately $1.2 to $1.7 billion per year would be used to fund construction and maintenance on public roads. Voters approved this measure November 2014.

Legislation to increase the state gas tax by 10 cents-per-gallon and increase oversized/overweight vehicle permit fees. The companion bills are estimated to generate an estimated $200 million per year for transportation infrastructure funding.

A 6 cents-per-gallon state gas tax increase, an additional 1 percent to the motor vehicle excise tax, and to raise license plate fees by 20 percent. Counties will also be allowed to increase property taxes for local transportation funding. SB 1 is anticipated to generate over $80 million for state and county
highway and bridge investment.

Legislation to increase the state gas tax by 5 cents-per-gallon, create a 12 percent tax on the statewide average wholesale price of motor fuel to replace the flat gas tax in the future (once AWP reaches $2.45/gallon), and permit counties to seek voter approval for a 1/4-cent sales and use tax increase for local transportation projects. A fiscal note estimates the bill could generate $101,625,500 for the Transportation Fund in the first two years.

A bill to increase the state gas tax by 7 cents-per-gallon, raise vehicle registration fees, and institute a fee on electric and hybrid cars in order to generate new funding for the state's roads and bridges. Additionally, a ‘surplus eliminator’ included in House Bill 312a would apportion half of any General Fund surplus for transportation in the next two fiscal years.

Legislation to eliminate a 4 percent sales tax on motor fuel (half of which was not used for transportation), increase the flat excise tax on gasoline to 26 cents-per-gallon (from 7.5 cents-per-gallon, excluding the 4 percent sales tax), index the new state gas tax to the Consumer Price Index (ending July 2018) and the Corporate Average Fuel Economy, and increase several transportation-related taxes and fees.

Nebraska legislators voted on May 14 to override the Governor's veto and approve a 6 cents-per-gallon state gas tax increase, for $76.2 million annually once fully implemented.

Connecticut legislators on June 29 approved $2.8 billion in transportation bonds to fund the first five years of Gov. Malloy’s (D) “Let's Go CT” program.

An 11.9 cents-per-gallon gas tax increase—gradually implemented beginning August 1 and fully applied on July 1, 2016—and an increase in transportation-related fees, including those for overweight vehicles. The bill will also permit Sound Transit residents to vote on a plan to increase taxes for an additional $15 billion in order to expand the region's light rail system.

Increase in both gasoline and diesel taxes to 26.3 cents-per-gallon, with indexing to inflation starting in 2022. Additional increases to vehicle registration fees, alternative fuel and electric vehicle fees, and General Fund transfers were included in the bill.

<td>Five years based on changes to the Consumer Price Index) and the consumers sales and service tax on sales of motor vehicles. Bill also adjusts the variable-rate state gas tax component (an additional 5 percent tax on the average wholesale price of gasoline, on top of the 20.5 cents-per-gallon flat excise tax) by raising the floor price (the minimum the tax can be charged at) from $2.34 per gallon to $3.04 per gallon. The resulting calculation would ensure that the variable-rate tax would never be less than 15.2 cents-per-gallon. SB 1006 also imposes additional registration fees for alternative-fuel and electric vehicles—an additional $200 for vehicles fueled with hydrogen or natural gas, $100 for vehicles operating on a combination of electricity and petrochemical fuels, and $200 for vehicles operating exclusively on electricity.</td>
