ABOUT THE TRANSPORTATION INVESTMENT ADVOCACY CENTER (TIAC)

The Transportation Investment Advocacy Center ™ (TIAC) is a first-of-its-kind, dynamic education program and Internet-based information resource designed to help private citizens, legislators, organizations and businesses successfully grow transportation investment at the state and local levels through the legislative and ballot initiative processes.

The TIAC website, www.transportationinvestment.org, helps transportation investment advocates to mount successful campaigns. It exists to put in one place—and promote the sharing of—strategies… sample political and communications tools… legislative and ballot initiative language… and information on where to obtain professional campaign advice, research and help. To receive free, regular email updates from the TIAC, subscribe to the TranspoAdvocates Blog (www.transportationinvestment.org/blog).

TIAC staff produces regular research reports and analyses, hosts an annual workshop in Washington, D.C., and holds ongoing webinars for transportation investment advocates featuring case studies, best practices, and the latest in political and media strategies. State and local chamber of commerce executives, state legislators, state and local transportation officials, “Better Roads & Transportation” group members, industry and labor executives, and leaders of state and local chapters of national organizations who have an interest in transportation development programs are welcomed to participate.

The Center’s program of work is also guided by a Transportation Investment Advocates Council, a national network of business professionals and public officials who share a common interest in building support for transportation infrastructure investments in their state or local community—roads, bridges, public transit, pedestrian walkways and cycling paths, airports, waterways, ports and rail facilities.

TIAC is a project of the American Road and Transportation Builders Association’s “Transportation Makes America Work!”™ (TMAW) and supported through voluntary contributions and sponsorships.

To become a sponsor or to make a contribution, contact TIAC Director Carolyn Kramer (ckramer@artba.org, or at 202-289-4434). Also contact Ms. Kramer if you have questions or comments about any reports or case studies published through the TIAC, or would like more information on the program and the Council.
June/July 2019 State Transportation Funding Overview

Forty-six states introduced over 300 bills related to increasing transportation investment in the first half of 2019.

Eighteen bills were enacted in June and July, including:
- **Illinois**: Increases the state gas tax from 19 cents per gallon to 38 cents per gallon (+19 CPG), indexed annually to changes in the Consumer Price Index for All Urban Consumers. Also institutes a $100 annual electric vehicle registration fee and raises motor vehicle registration fees of the first division.
- **Missouri**: $100 million bond to repair state bridges.
- **Colorado**: $106 million appropriation from the general fund for road and transportation projects.
- **Louisiana**: Dedicates the economic proceeds from the Deepwater Horizon litigation to transportation projects and redirects funding to the Construction Subfund of the Transportation Trust Fund.

*See page 56 for a list of 2019 approved transportation funding legislation.*

2019 State Transportation Funding Trends

**Motor fuel taxes**: Four states have approved statewide motor fuel tax increases, and an additional state has approved a local motor fuel tax. Of the four statewide gas tax increases, three included the addition of a variable-rate formula. Variable-rate gas taxes fluctuate automatically based on external factors. Twenty-four states proposed increasing one or more types of motor fuel tax to generate funding for transportation construction.

**Electric vehicle fees**: Nine states have enacted legislation to implement or increase their electric vehicle fees. Twenty-four states filed legislation to implement or adjust an electric vehicle registration fee. Eighteen of those states also included an additional registration fee for hybrid vehicles. In total, 28 states have an electric vehicle fee.

Several states are also considering innovative funding solutions during the 2019 legislative session. Mileage based user fee studies or pilot programs are being considered in fourteen states. Oregon approved expanding it’s existing pilot program, while Utah lawmakers passed legislation to permit electric and alternative fuel vehicle owners to opt into a road usage charge. Additionally, five states have introduced legislation to utilize tolling for new revenue.

Funding Approved in 2019 Legislative Session: $4,924,687,990

Bill Number: SD 870
Notes: An Act to explore alternative funding sources to ensure safe and reliable transportation.

This bill is intended to help address the need for the commonwealth to identify short- and long-term alternatives or supplements to the motor vehicle fuel tax, which is particularly important given the diminishing value of the motor vehicle fuel tax, declining supplies of conventional petroleum-based fuels, and increasing fuel-efficient vehicles. The commonwealth is uniquely positioned to become a leader in the advancement of technology and methods needed to develop and implement alternative ways to raise transportation revenue.

There shall be a vehicle mileage user fee task force to guide the development and evaluation of a pilot program to assess the potential for mileage-based revenue collection for Massachusetts' roads and highways as an alternative to the current system of taxing highway use through motor vehicle fuel taxes.
