ABOUT THE TRANSPORTATION INVESTMENT ADVOCACY CENTER (TIAC)

The Transportation Investment Advocacy Center™ (TIAC) is a first-of-its kind, dynamic education program and Internet-based information resource designed to help private citizens, legislators, organizations and businesses successfully grow transportation investment at the state and local levels through the legislative and ballot initiative processes.

The TIAC website, www.transportationinvestment.org, helps transportation investment advocates to mount successful campaigns. It exists to put in one place—and promote the sharing of—strategies... sample political and communications tools... legislative and ballot initiative language... and information on where to obtain professional campaign advice, research and help. To receive free, regular email updates from the TIAC, subscribe to the TranspoAdvocates Blog (www.transportationinvestment.org/blog).

TIAC staff produces regular research reports and analyses, hosts an annual workshop in Washington, D.C., and holds ongoing webinars for transportation investment advocates featuring case studies, best practices, and the latest in political and media strategies. State and local chamber of commerce executives, state legislators, state and local transportation officials, “Better Roads & Transportation” group members, industry and labor executives, and leaders of state and local chapters of national organizations who have an interest in transportation development programs are welcomed to participate.

The Center’s program of work is also guided by a Transportation Investment Advocates Council, a national network of business professionals and public officials who share a common interest in building support for transportation infrastructure investments in their state or local community— roads, bridges, public transit, pedestrian walkways and cycling paths, airports, waterways, ports and rail facilities.

TIAC is a project of the American Road and Transportation Builders Association’s “Transportation Makes America Work!”™ (TMAW) and supported through voluntary contributions and sponsorships.

To become a sponsor or to make a contribution, contact TIAC Director Carolyn Kramer (ckramer@artba.org), or at 202-289-4434). Also contact Ms. Kramer if you have questions or comments about any reports or case studies published through the TIAC, or would like more information on the program and the Council.

January 2020 State Transportation Funding Overview

Lawmakers in 24 states introduced nearly 100 transportation funding measures in January, according to analysis by ARTBA's Transportation Investment Advocacy Center® (ARTBA-TIAC).

A bill in Maine to establish a transportation funding commission, with a report due to the legislature by March, has already been approved and signed into law by the Gov. Janet Mills (D).

An Arizona bridge funding bill and an Idaho sales tax increase for transportation have each advanced from their chamber of origin.

The remaining bills are still in the early stages of the legislative review process. Dozens more bills are expected to be introduced as the year progresses.

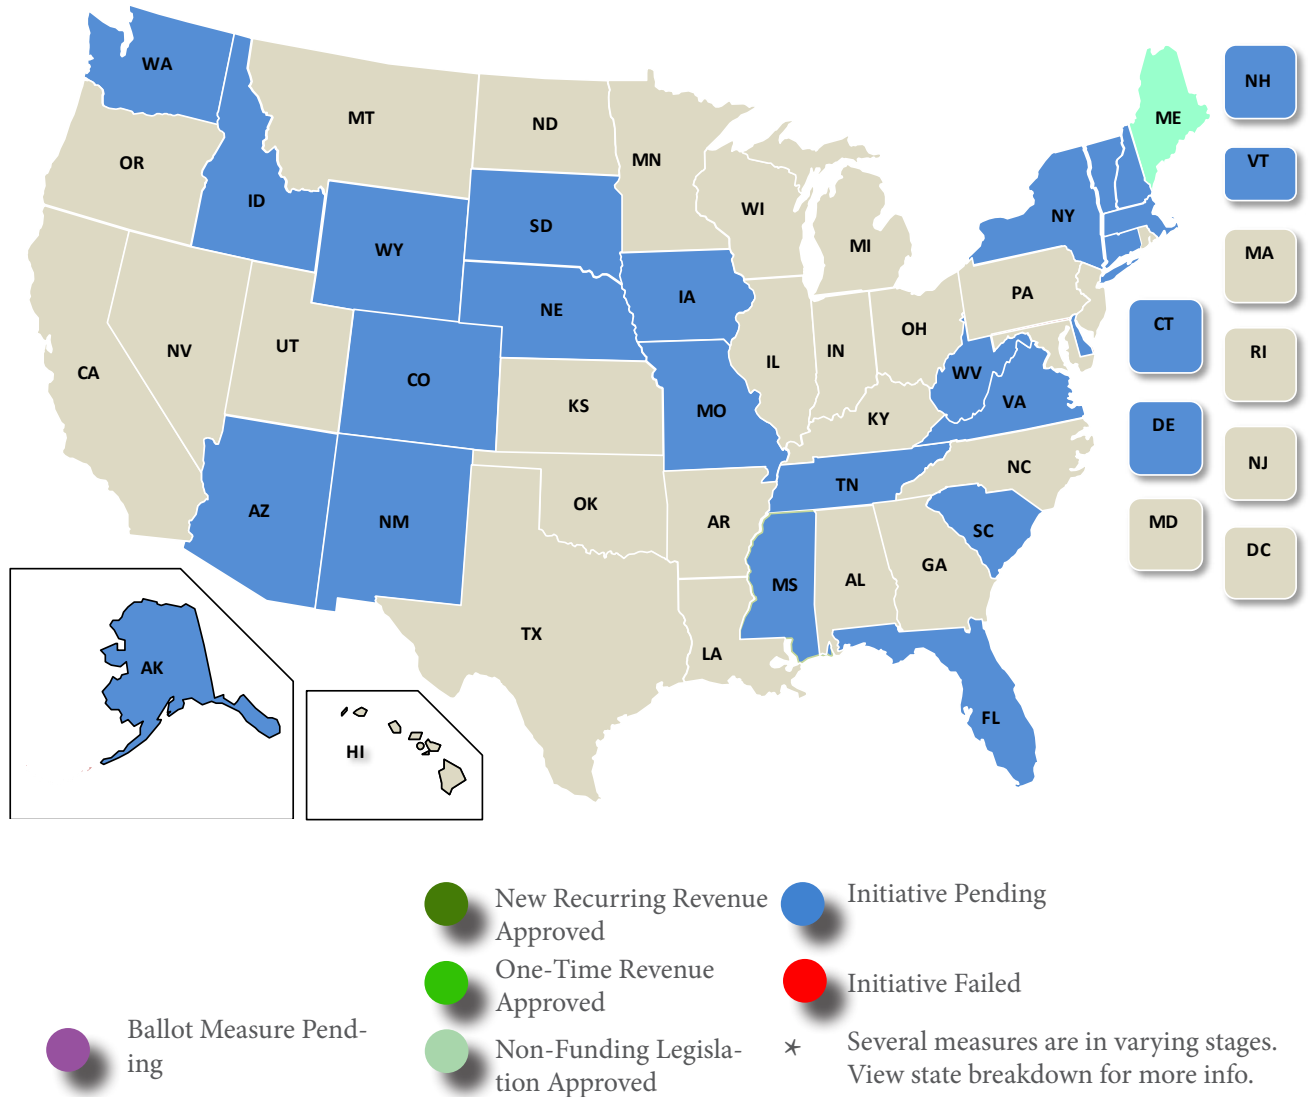

In addition to these legislative measures, Michigan will issue \$3.5 billion in bonds to add and expand 122 major state road projects. The plan was approved by the State Transportation Commission and did not require a legislative vote.

States are exploring a multitude of funding options to start the year.

- Eight states have proposed 13 bills to raise or adjust their motor fuel taxes. Five of those states have proposed converting to or adjusting an existing variable-rate motor fuel tax formula.
- Thirteen non-fuel tax recurring revenue bills (vehicle registration fees, license fees, severance taxes, among other mechanisms) have been introduced in nine states.
- Six states have proposed 34 bills to utilize one-time funding such as bonds or appropriations to provide transportation revenue. Twenty-seven of those bills are in Arizona alone.
- Building on a trend from previous years, five states introduced six bills to implement a fee on electric vehicles. Twenty-eight states now have an electric vehicle fee.
- Several states are also considering other innovative funding solutions, including mileage-based user fee studies or pilot programs.

See page 56 for a list of approved transportation funding legislation.

Introduced Date: 08/23/2018

Notes :

- Have the state borrow \$300 million from the gaming bond sinking fund, with \$50 million to be spent on specific projects and \$250 million going into a special MDOT fund for emergency projects statewide.
- Divert 35 percent of the state's 7 percent use tax on internet and out-of-state sales to cities, counties and the Local System Bridge Program. This share would mean approximately \$110 million a year with a good possibility for growth. This spending would be phased in adding 25 percent a year over four years.
- Split the use tax diversion 15 percent to cities, 15 percent to counties and 5 percent to the Local System Bridge Program
- Give Mississippi's roughly 300 cities \$10,000 each "off the top" of the use tax diversion, then the rest would be allocated based on their sales tax collections and population.
- Create a new tax on hybrid and electric cars. Electric auto owners would pay \$150 a year, hybrid owners \$75 a year. This would be indexed for future growth.
- The state would continue to collect the .4 cents a gallon on the 18.4 cent gas tax even when the environmental mitigation fund maximum of \$10 million is reached.
- Use newly legalized casino sports betting taxes for infrastructure.
