

EXECUTIVE SUMMARY:

States Approve \$23 Billion in New Transportation Investment

Lawmakers in 29 states approved 37 measures for over \$23 billion combined in new transportation revenue in the three quarters of 2023, according to a September analysis by ARTBA's Transportation Investment Advocacy Center.

One of the most significant bills to-date was signed into law by Minnesota Gov. Tim Walz (DFL) on May 24. The legislation institutes a new retail delivery fee (50 cents per delivery of \$100 or more, with exceptions), raises the metro sales tax for transit funding, increases the motor vehicle sales tax, and indexes the gas tax to inflation (Minnesota Highway Construction Cost Index, offset by removing the minimum markup on gasoline). The bill also includes several one-time funding provisions. The bill is estimated to generate \$1.3 billion over the next two years.

Other notable measures approved to-date include:

- Wisconsin transportation funding appropriation, increased electric vehicle fees, and dedicates electric vehicle (EV) sales taxes into the Transportation Fund;
- Dedication of 40 percent of sales taxes on vehicle purchases and 40 percent of sales and use taxes collected by the Maine Bureau of Motor Vehicles to the highway fund;
- A new road usage charge program for electric vehicles in Hawaii;
- Continuation of Indiana's gas tax indexing (limited to 1 cent-per-year increase) for an additional three years;
- New electric vehicle registration fees in Montana, New Hampshire, and Texas;
- Increased electric and plug-in hybrid registration fees in North Carolina;
- A tax on the sale of electricity at public electric vehicle charging stations in Georgia, Montana, and Utah;
- Continuation of voter-approved revenue (scheduled to sunset) for transportation in Texas; and

One-time funding continues to represent half of all bills introduced this session (120 bills) as states utilize surplus general funds, COVID relief revenue, and bonds to meet federal matches and jumpstart projects. Legislation to implement or increase electric vehicle fees—including charging fees and registration fees—is the second most popular category being explored by state legislatures, with 37 bills (15 percent of 2023 transportation funding legislation) introduced in the first eight months of year, a significant increase when compared to the eight bills tracked in the previous year.

One-time funding measures were approved in 15 states, including:

- A \$4 billion general fund transfer for projects in Florida;
- A combined \$2.8 billion in general fund revenue and bonds for the I-70 project in Missouri; and
- \$3.3 billion general fund transfer to the Tennessee Department of Transportation, as well as increase electric vehicle registration fees.
